DETAILED ACTION

Status of the Application

- [1] Claims 66, 88, 91, 105-106, and 109-120 are pending in the application.
- [2] Applicant's amendment to the claims, filed 21 September 2006 is acknowledged and has been entered into the application. This listing of the claims replaces all prior versions and listings of the claims.
- [3] Applicant's arguments filed 21 September 2006 have been fully considered and are deemed to be persuasive to overcome the rejection(s) previously applied.
- [4] This application is in condition for allowance except for the following formal matters:

Sequence Compliance

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825; applicants' attention is directed to the final rulemaking notice published at 55 FR 18230 (May 1, 1990), and 1114 OG 29 (May 15, 1990). To be in compliance, applicants should identify nucleotide sequences of at least 10 nucleotides and amino acid sequences of at least 4 amino acids in the specification by a proper sequence identifier, i.e., "SEQ ID NO:" (see MPEP 2422.01). If these sequences have not been listed in the computer readable form and paper copy of the sequence listing, applicant must provide an initial computer readable form (CRF) copy of the "Sequence Listing", an initial paper copy of the "Sequence Listing", as well as an amendment

Art Unit: 1656

directing its entry into the specification, and a statement that the content of the paper and CRF copies are the same and, where applicable, include no new matter as required by 37 C.F.R. 1.821(e) or 1.821(f) or 1.821(g) or 1.821(b) or 1.825(d). See particularly Figures 6 and 7. Due to the lengthy specification, applicant's cooperation is requested in reviewing the application for additional sequences that should be identified using a sequence identifier.

Hyperlink

The attempt to incorporate subject matter into this application by reference to a hyperlink embedded in the specification (for example, page 15, line 28) is improper. Incorporation of subject matter into the patent application by reference to a hyperlink and/or other forms of browser-executable code is considered to be an improper incorporation by reference. See MPEP 608.01 regarding hyperlinks in the specification and 608.01(p), paragraph I regarding incorporation by reference. Due to the lengthy specification, applicant's cooperation is requested in reviewing the application for additional hyperlinks.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
